

SOLUTION ASSESSMENT:

**DESIGNING A SOLUTION THAT
SUPPORTS STRATEGIC GOALS**

Change within an organization can be daunting and identifying what changes make the most impact can be difficult.

A Solution Assessment identifies how RMS models, software, data and services are combined in a target solution. The engagement provides an implementation plan, the benefits and costs of transformation.

The Solution Assessment is designed to reduce risk and increase implementation success.

FUNDAMENTAL QUESTIONS PRIOR TO EMBARKING ON LARGE-SCALE PROJECTS...

- What is the best solution to address our current and future business challenges?
- How does this change align with strategic priorities and enable our organization to hit our goals?
- Does the new solution meet all our business and technical requirements?
- What technology and integration changes must be made to implement the new solution?
- How will this impact our workflows?
- How should we approach the implementation plan?
- What are the costs and benefits?

...answered by a **Solution
Assessment from RMS
Consulting**

A blue-tinted background image showing a pen resting on a document with a line graph. The pen is silver and blue, and the graph is a line chart with multiple data series. The background is a gradient of blue, with a large white arrow pointing from the left side towards the right side, where the text is located.

Assessment activities involve key stakeholders and are structured to make the best use of their time.

ACTIVITIES TO ANSWER KEY QUESTIONS

Strategy review

Technical workshops and hands-on access to software

Identify any critical gaps

Conduct IT / compliance due diligence

Determine infrastructure sizing & costs

Review commercials & contracts

Clients can assess the value of RMS capabilities relating to key use cases, and the resulting business case will highlight the value drivers as they relate to a client's organizational goals.

DELIVERABLES TO FORMULATE THE PLAN

High-level solution architecture

System integration inventory

Implementation plan

Business case
